

KAIZEN STORM

Continual Improvement Boost

FREEING UP YOUR VALUE

IT'S THERE FOR THE SAVING!

90 working days

The number of days per year we spend on activities that add no value to our clients*

4.6 working days

Days per year saved when 10 mins of wasteful activities per day are eliminated

1 %

The percentage of your working year needed to participate in Kaizen Storm

KAIZEN STORM

REVIEW & REVISE

Imperfections are everywhere. Some stand out like a sore thumb, whilst others become very well-hidden in our daily routines. Whatever the case, they represent **value which is trapped** in our system and they come with a price tag.

Kaizen Storm is a workshop designed to bring to the surface those imperfections in our ways of working and the work environment, which, for one reason or another, never seem to get fixed. Once identified, the participants work on the best way of providing a **definitive solution** – and then **APPLY IT!**

OBJECTIVES & OUTPUTS

TANGIBLE RESULTS

Improve day to day workplace efficiency

Recurring problems fixed

Increase ownership and responsibility for processes and ways of working

Submerged difficulties brought to light

Reinforce sense of team and common purpose

Continual improvement culture initiated or reinforced

Make people feel appreciated within the organisation

Team galvanised

WORKSHOP OVERVIEW

KAIZEN STORM AT A GLANCE

#1 SITE VISIT

Brief assessment of business processes and selection of participants. (0.5 days)

#2 KAIZEN DAY

How to hunt down waste. Finding trapped value. (1 day)

#3 REAL TIME IMPROVEMENT

Fixing problems & application of solutions. (1 day)

#4 NEXT STEPS

Looking for deeper improvements.

SITE VISIT

#1

Consultant visits the working environment to understand basic business processes and ways of working and assess current areas where efficiency may be lacking. The visit may be run virtually and will involve some short, informal interviews with selected staff.

KAIZEN DAY

#2

Morning dedicated to raising awareness of wastes within processes to ensure participants are able to look critically with new eyes at their current processes.

Participants look critically at processes and environments, identify areas of waste and categorise according to gravity and ease of resolution. Decision makers are involved in the transfer of actions into shared Kanban Task Board.

REAL TIME IMPROVEMENT

#3

Participants work together introducing the improvements identified during the KAIZEN DAY.

Fixing the problems in real time means the participants can see their ideas turned into actions.

Towards the end of the day, the Kanban Task Board is updated and the results of the work completed are presented to those who will be impacted by it.

NEXT STEPS

#4

Many ideas raised will require more than a day's effort in order to solve them.

Planning these ideas into a long-term improvement project will enhance the work carried out by the participants and further consolidate a sense of belonging to the organisation.
